APJ Abdul Kalam's Birthday Celebrations: Essay Writing and Elocution Competitions

October 15th marks the birth anniversary of Dr. APJ Abdul Kalam, a renowned scientist, educator, and former President of India. To commemorate this occasion, various educational institutions organize essay writing and elocution competitions.

Themes often focus on Dr. Kalam's life, achievements, and vision for India. Students are encouraged to explore his contributions to science, technology, and education. Essays can be written in various languages, including English, Hindi, and regional languages.

Participants deliver speeches on topics related to Dr. Kalam's life and legacy. Emphasis is on promoting public speaking skills, confidence, and leadership qualities. Judges evaluate participants based on content, delivery, and overall impact.

To inspire students to emulate Dr. Kalam's values and achievements. To promote awareness about his contributions to India's development. To encourage critical thinking, creativity, and effective communication skills.

Topic: A.P.J. Abdul Kalam
 Date of English: _____ at 15th Birthday Celebrations
 B. Presidency
 IBSC (Karnataka)
Essay Writing

An essay on Dr. A.P.J. Abdul Kalam should highlight his journey from a humble background to becoming a prominent scientist and the 11th President of India. His popular image as the "Missile Man of India" for his role in developing the Agni and Prithvi missiles, and his role in the Pokhran-II nuclear tests. The essay should also emphasize his inspirational role, especially for students, his vision for a developed India, and his final role as the "People's President" before his death in 2015.

*** Early life and Education :-**

→ Describe his upbringing in a family with limited financial means, where he had to start working at a young age to support his family.

→ Highlight his perseverance and academic excellence, emphasizing that he never let his circumstances hinder his

→ Mention his graduation in physics and his later studies in aerospace engineering at the Madhav Institute of Technology.

→ Include his dream of becoming a fighter pilot, which he couldn't fulfill after ranking ninth in the Indian Air Force (IAF).

*** Contributions as a Scientist :-**

→ Detail his work as a scientist and his role in India's space and defense programs, including his early work at the Indian Space Research Organisation (ISRO).

→ Focus on his pivotal role in developing India's strategic missile systems, earning him the title "Missile Man of India" for missile like Agni and Prithvi.

→ Include his significant contribution to the Pokhran nuclear tests in 1998, which established India as a nuclear power.

→ Mention his work on the Technology Vision 2020 documents, which aimed to guide India toward becoming a developed nation.

*** Presidency and Legacy :-**

→ Describe his presidency from 2002 to 2007, during which he was widely known as the "People's President".

→ Emphasize his passion for connecting with and inspiring students, sharing his vision for their future and the nation's development.

→ Discuss his vision for societal growth through scientific temper, innovation, and self-reliance.

→ Note his passing in 2015 and how it was a great loss for the nation, but his legacy as an inspiring leader, a kind-hearted human.

*** Notable Work :-**

Wings of Fire India (2020)
 Ignited Minds Indomitable Spirit
 Transcendence

*** Scientific Career :-**

→ Honours :- Padma Bhushan (1981)
 Padma Vibhushan (1990)
 Bharat Ratna (1997)

APJ ABDUL KALAM

Dr. A.P.J. Abdul Kalam was born in Rameswaram, Tamil Nadu, in 1931 and came from a humble family. He became a renowned scientist, working at the defense research and development organization (DRDO) and the India's space research organization (ISRO), where he was instrumental in developing India's missile and space programs, earning him the title "Missile Man of India". From 2002 to 2007, he served as the 11th president of India and was known as the "people's president" for his dedication to the country's development and his deep connection with the youth. He died on July 27, 2015, while giving a lecture in Shillong.

Early life and education:
 Born on October 15, 1931 in Rameswaram, Tamil Nadu, to a poor family of modest means. His father was a boat owner and his mother was a homemaker. They instilled values of

honesty, kindness and respect in their children. He worked as a newspaper vendor at a young age to help support his family. Kalam was a determined and hard-working student with a strong desire to learn, particularly in mathematics and physics. He pursued a degree in physics from St. Joseph's College and later an aerospace engineering degree from the Madras Institute of Technology. During his studies, he was deeply inspired by his teachers and dreamed of becoming a pilot but was unable to achieve this due to his rank in the qualifying exam.

Scientific and professional career:
 He joined the Defense Research and Development Organization (DRDO) in 1958, later moving to the Indian Space Research Organization (ISRO). At ISRO, he led the project that successfully launched India's first satellite vehicle.

Presidency: He was elected the 11th president of India in 2002 and served until 2007. He was earned the "people's president" title.

Final years and legacy: After his presidency, he continued to work as a teacher, inspiring the youth of India and advocating for his "technology vision 2020" plan.

A.P.J. Abdul Kalam
15th Oct 1931 Birth day celebration
Department of English
Essay writing (7/10)

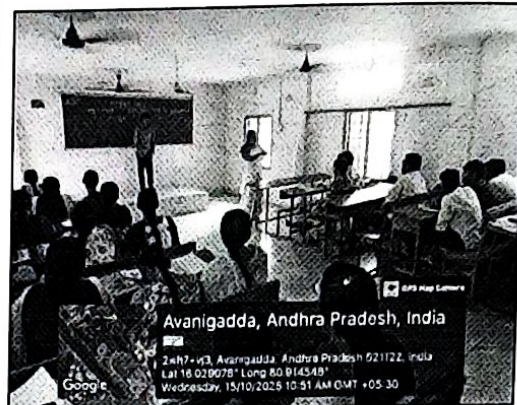

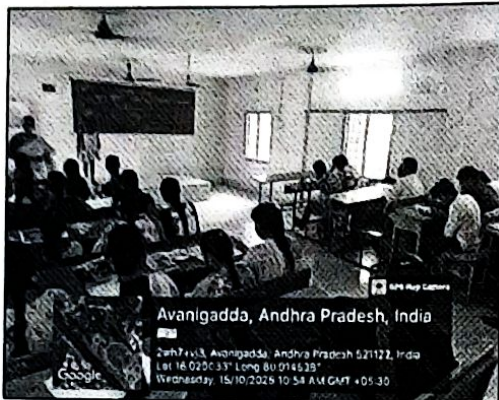

Dr. A.P.J. Abdul Kalam's Birth Day, celebrated on October 15th, is a day to honor the life and legacy of one of India's most beloved scientists and former Presidents. Known as the "Missile Man" for his significant contributions to India's space and defense programs, Dr. Kalam inspired millions with his vision for a better and more technologically advanced India. His humble beginnings, combined with his dedication to education, innovation, and leadership, made him a role model for students and professionals alike. On his birth day, various educational institutions and organizations across the country conduct events, including lectures, science exhibitions, and discussions to celebrate his achievements and inspire future generations.

The celebration of Dr. Kalam's birth day is just about remembering his work, but also about continuing his mission of fostering a knowledge-driven society. Students and young professionals, in particular, are encouraged to follow his path of hard work, humility and perseverance. Many schools hold special events where children engage in creative activities like essay writing, drawing and speeches to express their admiration for Dr. Kalam's vision of "Pura Kshetra" (an inclusive progressive nation). Through these celebrations, his spirit of innovation and love for the nation continues to inspire individuals to dream big and contribute to the country's growth.

Inspiring Slogan:-
 "Dream, Dream, Dream. Dreams transform into thoughts, and thoughts result in action."
